

OIT Vista/Office 2007 Deployment Policy

OIT will deploy Vista/Office 2007 to staff and faculty as part of a new install (Ghost Image) and begin deployment on or about 1 May 2007. OIT staff will be busy working compatibility issues with other applications which include GroupWise Client.

Staff and faculty requesting retrofit installs of Vista/Office 2007 must meet hardware configuration requirement and submit written approval from their Dean stating that Vista/Office 2007 meets business requirements that XP/2003 will not meet. To get hardware requirements, go to our OIT Website link ([Hardware Requirements for Windows Vista](#)) or call Jeff Kurtz, Coordinator, Technology Refresh Program at extension 5541.

LAB Managers who will install Vista immediately for class requirements must understand OIT will be very limited in supporting Vista/Office 2007 issues prior to the deployment date.
